

Falzol ATF Dexron II is a high quality, high performance automatic transmission fluid

PRODUCT CODE: FAATF

ATF Dexron II

FALZOL ATF DEXRON II is a high quality, high performance automatic transmission fluid containing viscosity improvers, anti-wear and anti-foam additives, friction modifiers and anti-oxidants for long life stability. Falzol ATF Dexron II is designed for use in automatic transmissions manufactured by General Motors, Vauxhall and Opel. It may also be used in Ford vehicles having red dipsticks. Falzol Autotras DTF II can also be used as a power steering fluid in the appropriate vehicles. Falzol ATF Dexron II is dyed red for identification purposes. High quality, high performance automatic transmission fluid suitable for use with Dennison, Sperry Vickers, and Sunstrand hydraulic pump systems.

BENEFITS:

- Protection against wear
- Low foaming tendencies
- Can be used as a power steering fluid
- High temperature stability

TYPICAL ANALYSIS:

GM	Dexron II
Allison	C3
Caterpillar	TO-2

Specific Gravity @ 15.6°C	0.883
Kinematic Viscosity @ 100°C (cSt)	6.80
Flash Point (°C)	210
Copper Corrosion	Nil
Brookfield Viscosity @ 23.3°C	4,000 cP max
@ -40.0°C	50,000 cP max
