

A fully synthetic fuel-efficient engine oil.

PRODUCT CODE: FDRIFB

DRIVE F 5W 20

FALZOL DRIVE F 5W 20 A fully synthetic fuel-efficient engine oil for use with modern petrol and diesel engines. Specialist Adaptive Molecular Technology maintains the power and efficiency of engines to improve the overall reliability, ensuring optimum performance and delivering outstanding durability in all conditions for the most demanding motorist.

FALZOL DRIVE F 5W 20 Suitable to use in naturally aspirated and turbocharged engines that run on petrol or diesel fuels. Specifically engineered to meet the requirements of Ford EcoBoost petrol engines. Miscible with synthetic and mineral based engine oils. Recommended as suitable for the following applications in passenger cars and light commercial vehicles.

BENEFITS:

- Outstanding protection against wear, rust and corrosion.
- Excellent thermal stability.
- Superior oxidation resistance.
- Long service intervals.
- Increases fuel economy.
- Improves low temperature performance.

TYPICAL ANALYSIS:

Density @ 15°C	-	0.845	API	SN/ CF
Flash Point (°C)	-	233	Ford	WSS-M2C948-B
Kinematic Viscosity cSt @ 100°C	-	8.3	ILSAC	GF 5
Kinematic Viscosity cSt @ 40°C	-	45.1		
Pour Point (°C)	-	-48		
Total Base Number (mg KOH/g)	-	7.9		
Viscosity Index		161
